ABOUT ME

Motivated and passionate Third year Computer Science student with a strong passion for AI Engineering and Software Development. A highly motivated and aspiring professional seeking an opportunity to gain practical experience and contribute to innovative projects. Passionate about leveraging Full Stack Development and Data Analytics to develop solutions for real-world challenges. Well-versed with Web Development and Full Stack Development. Beyond my technical skills, I possess strong problem solving abilities, adaptability, and a keen eye for detail. I thrive in collaborative environments and enjoy working with diverse teams to develop creative and effective solution.

TECHNICAL SKILLS

- Python
- Java
- SQL
- Web Development
- Full Stack Development

EDUCATION

S.R.M Institute Of Science And Technology | 2023–2027

Bachelor of Technology [BTech]

- CGPA:9.6

PROJECTS

- **Website blocker** – Chrome extension that allows users to block and unblock websites using their URLs.

- **Jumbled words quiz game with Morse Code –**This interactive game challenges players to decode and rearrange words, making learning Morse code both fun and engaging.

- **Kinship In Christ –** Kinship in Christ is a church community management app built using Flutter. It allows families to register, view members, read church bulletins, and make donations. Key features include multi-step family registration, GPS-based address autofill, local SQLite storage for offline functionality, and a user-friendly dashboard for seamless church engagement.

- **Project Cloud –** An AI-powered tool that analyzes facial images to detect skin issues and provides personalized skincare routines, product suggestions, and remedies based on skin type and budget.
